3 vessel in situ fenestrated aortic graft

Scope

Technology has been breaking boundaries in medical sciences. We here at SCTIMST were the torchbearers of innovations in medical sciences in India by the amalgamation with engineering, basic science and public health and were responsible for the development of the first indigenous aortic valve in India, the Chitra blood bag is another success story. At this juncture, as we complete 43 years of dedicated innovations to society, the knowledge and expertise we possess on the development, validation, clinical trials, translation and commercialization of medical devices, and at the same time delivering high-end medical care in neurological and cardiological disciplines and public health, we think it is time to share and hence this Journal.

The Journal will publish reviews in the field of medical sciences with a focus on cardiological and neurological sciences, biomedical technologies and public health.

Contents

Volume 1, Issue 2, 2023

- e23011 *Editorial*
Maya Nandkumar A
- e23012 *Review Article: Kartogenin - a potential small molecule for managing osteoarthritis*
Reinier A. González Heredia, Venkata S. Patchigolla, Lakshmi S. Nair
- e23013 *Clinical Commentary: Endovascular three-vessel in situ fenestrated aortic grafts for thoracic aortic reconstruction in the management of complicated type B dissection*
Jineesh Valakkada, Anoop Ayappan, Shivanesan, Venkata Subbiah
- e23014 *Review Article: Public health in India: Leveraging technology for a brighter future*
Adrija Roy, Biju Soman
- e23015 *Art in Science: Exploring nature's canvas: Witnessing the artistry of biodegradation*
Remya NS
- e23016 *Perspective: Delivering service on a quality platform: Case of medical device testing services from a research institution of national importance*
Sandhya CG, Balram S
- e23017 *Review Article: Regenerative dentistry: Current status and future scopes*
Eva C Das, Manoj Komath
- e23018 *Advertising Feature: Internationally Accredited testing services for medical devices, biomaterials and IVDs*
Sandhya CG, Balram S
