Colorful display of haemodynamic features of a cerebral aneurysm

Scope

Technology has been breaking boundaries in medical sciences. We here at SCTIMST were the torchbearers of innovations in medical sciences in India by the amalgamation with engineering, basic science and public health and were responsible for the development of the first indigenous aortic valve in India, the Chitra blood bag is another success story. At this juncture, as we complete 43 years of dedicated innovations to society, the knowledge and expertise we possess on the development, validation, clinical trials, translation and commercialization of medical devices, and at the same time delivering high-end medical care in neurological and cardiological disciplines and public health, we think it is time to share and hence this Journal.

The Journal will publish reviews in the field of medical sciences with a focus on cardiological and neurological sciences, biomedical technologies and public health.

Contents

Volume 1, Number 3, 2023

- e23019 *Editorial*
Maya Nandkumar A
- e23020 *Perspective: We aim to cure - but do we think of care?*
Rakhal Gaitonde
- e23021 *Perspective: Computational fluid Dynamics: simulation studies in cerebral aneurysms*
B. Jayanand Sudhir, Ramkishan Nekkanti, S. Asif, Valeti Chanikya, Mahesh Nagargoje, Santhosh K. Kannath, H.V. Easwer, K. Krishnakumar, B.S.V. Prasad Patnaik
- e23022 *Commentary: Security in hospital information systems*
Suresh Kumar Balakrishnan, Geetha Govindan
- e23023 *Advertising Feature: The power of digital PCR - finding a needle in a haystack*
- e23024 *Review Article: Cell-based therapies for type I diabetes mellitus: recent advances*
Jijo Wilson, Prabha D. Nair
- e23025 *Review Article: Biventricular repair in double outlet right ventricle with non committed VSD: imposible to possible*
Hemlata Verma, Anula Sisodia
- e23026 *Advertising Feature: SCTIMST - Your partner for testing and biological evaluation of medical devices & biomaterials*
